

FINANCE & ACCOUNTING SERVICES

Equipping Non-profits with Strong Finance & Accounting Practices

At DVCG, we understand the importance of Financial Management and Accounting for non-profit organizations. Our tailored consulting services are designed to empower non-profits with the financial expertise needed to navigate complex financial landscapes, optimize resources and achieve their missions effectively.

Our consultants possess extensive experience in Finance & Accounting — from bookkeeping to fractional CFO support and everything in between, including cleaning up financials, preparing for audits, providing strategic guidance at the executive level and implementing technology solutions. We recognize that every non-profit is unique, so we customize our services to meet your specific needs, goals and budget constraints.

What Could DVCG Finance & Accounting Projects Look Like?

Financial Planning & Budgeting

We assist non-profit organizations in developing comprehensive financial plans and budgets aligned with their strategic goals. Our team works closely with you to analyze past financial data, forecast future trends and create realistic budgets to support your mission and objectives.

Financial Reporting & Analysis

We provide expertise in generating accurate and insightful financial reports adapted to the needs of non-profit stakeholders, including board members, donors and regulatory authorities. Our analysis helps you gain valuable insights into your organization's financial performance, enabling informed decision-making and strategic planning.

Internal Controls & Risk Management

Establish robust internal control systems to safeguard assets, prevent fraud and ensure compliance with regulatory standards. Our risk management strategies mitigate financial risks and enhance the overall governance structure of your organization. We assess your current processes, create a set of recommended changes, perform the necessary clean-up and optimize internal practices.

Financial Systems Implementation

We assist in the selection, customization and implementation of financial management software tailored to the distinctive needs of your organization. Whether you require financial accounting software, donor management systems or enterprise resource planning (ERP) solutions, we provide expert guidance to streamline your financial operations.

Audit Preparation

Our team provides comprehensive support in preparing for financial audits, ensuring that your organization is well-prepared to meet audit requirements and facilitate a smooth audit process. We assist in organizing financial documentation, conducting internal reviews and addressing potential audit findings to minimize risks and ensure compliance with regulatory standards.

Fractional CFO Support

Gain access to experienced Chief Financial Officer (CFO) professionals on a fractional basis, providing strategic financial leadership and guidance without the overhead costs of a full-time executive. Our fractional CFOs work closely with your leadership team to develop financial strategies, optimize resource allocation and drive organizational growth and sustainability.
